### **A Complete Library of Images!**

HOT SPRINGS – If you've done much multi-media development work, you know it can be a difficult and time consuming task to find the right background image for the slides in your production.

And even when you find the right background image, your work is hardly over, as you have to check to be sure you are not violating anyone's copy right when you use that image. Checking out copy-rights can be a long and expensive process.

One company very familiar with the development of multi-media presentations for corporate and CD ROM use has come up with what may be the ultimate solution to this problem - **a complete library of over 1,500 background images created specifically for multimedia, all offered Royalty Free and on a single CD ROM!!!**

Armed with the **Hamilton Background Images V3.0 CD ROM**, a multi-media developer has easy access to over 1,500 new and original full screen images, all designed with the multimedia producer in mind. And all provided Royalty Free!

### **High Quality & Royalty Free**

**The Hamilton Background Images V3.0 CD** has images to suit most applications, with categories including:

- Business & Office Images
- Money & Finance Images
- TV News 'Look' Backgrounds
- Framed Images
- Gradient Images & Patterns
- Textures & Tiles
- Special Effects

All of the images on this CD ROM are provided in full screen, 640X480 X 256

color for mat - the format most needed by multi-media producers.

All images on this CD ROM are provided **Royalty Free** - which means the multi-media producer can use any of these images in any kind of production, with the knowledge that he has full authority to do so!!! (*The only restriction on the use of images is that they can not be re sold as a collection of images.*)

### **Multi-Media Backgrounds Made Easy!**

We tried **Hamilton's Background Images V3.0 CD ROM**, and we were pleasantly surprised. With the built-in viewing program it is easy to quickly review thumbnails of all the images in each category. Any time you want to see a full screen image, you simply click on the thumb nail, and it is immediately displayed full screen.

When an image is selected for use, one mouse click copies it from the CD ROM directly into your presentation. The copy function even allows you to convert the image into any of 30 standard image formats!

Over all, we liked this product. The variety and quality of images on this CD fills the bill for the type of multi-media we're working on (*we especially liked the TV Background images!*) And finding and using the images on this CD is a breeze.

This CD ROM gives you over 1,500 quality images with the added value of **Royalty Free** usage, along with an easy interface. We like it!

The **Hamilton Background Images V3.0 CD ROM** is priced at \$79 and is available exclusively from Hamilton New Media. For more information call 1-501-321-2208.
